

Drought

GENERAL PREPARATION

- Fix dripping faucets.
- Have a plumber inspect for other leaks.
- Inspect sprinkler system. Repair any damages.
- Consider a rainwater collection system to use for watering interior and exterior plants.
- When appliances like sinks and toilets need to be replaced, consider choosing low-energy, low-volume, water-efficient options.

DURING A DROUGHT

- Reuse water, when possible.
- Avoid cooking outside.
- Store propane tanks inside.
- Compost food waste instead of using a garbage disposal.
- Turn exterior sprinkler system off. Water manually with recycled water, if necessary.
- Check that water is stocked in your Emergency Preparation Kit.
